

AI Audit Report – HW05 Performance Testing

Student: Huỳnh Gia Âu | **MSSV:** 23127153
Declaration: I use AI tools for the tasks below.

Interaction 1

Field	Content
Tool	Cursor Agent
Date	2026-08-30T23:00+07:00
Prompt	Restate HW05 deliverables for EShop API perf testing: JMeter Load/Stress/Spike, CSV, 3 listener types, endurance, Task 2 misinterpretation, Task 3 CI proposal. Student 23127153.
Output	Checklist of JMX naming, E2E flow, docs, video TODO. No scripts yet.

Interaction 2

Field	Content
Tool	Cursor Agent
Date	2026-08-30T23:30+07:00
Prompt	Generate Python JMX builder for login→search→detail→cart→checkout with JSONPostProcessor for token and product id. Port 3010.
Output	`scripts/generate_jmx.py`, `data/users.csv`, four scenario configs. First version had invalid SummaryReport XML – fixed to ResultCollector.

Interaction 3

Field	Content
Tool	Cursor Agent
Date	2026-08-31T00:00+07:00
Prompt	Run JMeter, fix XML parse errors, produce JTL/HTML.
Output	Fixed listeners; added `run_all.bat`, `reset-eshop-api.ps1`, `summarize_jtl.py`. Identified seed-before-run requirement.

Interaction 4

Field	Content
Tool	Cursor Agent
Date	2026-08-31T00:15+07:00
Prompt	Write main report Task 2 table with deliberate AI mistakes corrected from JTL evidence.
Output	Section 6 in `docs/main-report.md` – four misinterpretation rows.

****Human review:**** Verify JTL numbers in `results/summary.json` match report tables before submission.
